BOXWOOD (Weller's Hardy Northern Type)

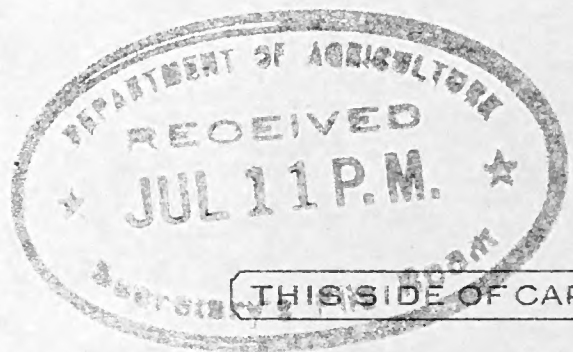

During the last twenty years we have developed a Boxwood which has proved hardy in this part of the country as well as in other sections where otherwise no other Boxwood would survive. It stood the severe winter of five years ago of 28 degrees below, while most other types in southern areas were partly exterminated. No wonder that it has since grown in popularity to such an extent that we can not keep up with the demand. For hedging there is not a cleaner, healthier looking and prettier plant on the market.

We offer for fall and spring, for hedging and window boxes the following; First shipment can be made in July, second in Sept-Oct:

	Per 10	Per 100
BUSHFORM, without ball, 6-8 inches	\$2.00	\$15.00
BUSHFORM, without ball, 8-10 inches	2.50	20.00
BUSHFORM, without ball, 10-12 inches	3.50	30.00
